Professional Experience

Gambling.com Group

Lead Developer – BetSyndicate.ai

Nov 2025 · Jun 2026

Led development for BetSyndicate.ai, overseeing architecture, feature delivery, integrations, and ongoing platform development. The platform uses AI models and betting data to identify high-value and unique betting opportunities.

Key Responsibilities

- Led frontend and backend development across the platform
- Worked closely with data providers and integrations to deliver betting intelligence features
- Managed deployments, infrastructure, and third-party integrations
- Collaborated with stakeholders on product direction and technical implementation
- Built scalable systems and maintained platform performance
- Coordinated platform releases and deployments
- Reviewed pull requests and maintained coding standards across the project

Technologies & Platforms

- PHP
- WordPress
- React
- Databases
- Kinsta
- Stripe
- Customer.io
- Discord integrations

AI & Betting Intelligence

- AI models analyse sports data including player history, injuries, team performance, betting history, player statistics, and weather conditions to calculate high-value betting opportunities
- Combination of automated AI recommendations and human-reviewed betting workflows

Data & Betting Integrations

- OpticOdds
- OddsJam

- StatsPerform

Full Stack Developer

Dec 2020 · Nov 2025

Technologies & Platforms

- Laravel
- PHP
- React
- AWS services
- Databases
- Kinsta
- Stripe
- Customer.io
- Discord integrations

Promoted from Frontend Developer to Full Stack Developer, working across multiple international betting, casino, media, and adtech platforms.

Key Responsibilities

- Developed and maintained large-scale web applications and affiliate platforms
- Built frontend interfaces and backend functionality using Laravel, PHP, React, Twig, and WordPress
- Collaborated with product, design, QA, and marketing teams to deliver new features and optimise performance
- Worked across both greenfield projects and established high-traffic websites
- Contributed to mobile app development using React Native
- Maintained scalable codebases and reusable components

Projects Worked On

- Casinos.co.nz
- CasinoSource.co.uk
- Gambling.com/corporate
- Bookies.com
- BetSyndicate.ai
- Gannett AdTech (including USA Today integrations)
- Rotowire mobile app (React Native project)

Notable Experience

- Longest-running project: Bookies.com, built using Laravel

- Worked on adtech integrations connected to major US media publishers
- Served as Interim Lead Developer on the Gannett AdTech project until a permanent US-based lead was appointed
- Coordinated releases and deployments across multiple Gannett publisher integrations and reverse proxied media pages
- Worked directly with external Gannett stakeholders and US-based teams during project delivery
- Worked extensively with AWS services, infrastructure tooling, databases, payment integrations, and customer engagement platforms
- Experience developing both consumer-facing platforms and internal tools

Frontend Developer

Sep 2018 · Dec 2020

Joined Gambling.com Group as a Frontend Developer after completing an internship with the company.

Responsibilities

- Developed responsive frontend experiences across multiple affiliate websites
- Worked with PHP, Twig, WordPress, JavaScript, HTML, and CSS
- Collaborated closely with backend developers and QA teams
- Implemented new UI components and landing pages
- Supported optimisation and maintenance of high-traffic websites
- Focused heavily on SEO optimisation, responsive performance, and Google Core Web Vitals

QA & Developer Intern

Completed a college internship as part of degree requirements.

Responsibilities

- Assisted with QA testing and bug reporting
- Supported frontend and backend development tasks
- Worked within agile development teams
- Gained hands-on experience in web development workflows and production deployments

Freelance Web Developer & Photographer

Provided freelance web development and photography services for local businesses.

Clients

- Bodynamics Gym
- Inferno Gym
- Jaisun House

Services Provided

- Website design and development
- UI/UX design and frontend implementation
- SEO optimisation
- Business website maintenance
- Brand photography and promotional content
- Fitness and commercial photography

Education

National College of Ireland

Bachelor's Degree in Computer Science

2014 – 2018

Grade: 2.1 Honours

Key Achievements & Leadership

Technical Leadership

- Lead Developer for BetSyndicate.ai
- Served as Interim Lead Developer on the Gannett AdTech project
- Responsible for technical decision-making, research spikes, architecture planning, and technology selection
- Managed bi-weekly sprint releases and deployment processes
- Experienced reviewing pull requests and maintaining engineering standards

- Integrated Microsoft Copilot into GitHub workflows to improve code reviews, security, and development standards

Mentoring & Collaboration

- Mentored interns and junior developers, including supporting and onboarding an intern on CasinoSource
- Trained and onboarded new developers, including mentoring the incoming US-based lead developer on the Gannett project
- Known for strong collaboration, knowledge sharing, and supporting team members across projects
- Enjoy mentoring junior developers and assisting teammates with technical challenges
- Participated in technical interviews as an engineering reviewer

Scalability & Performance

- Worked across projects ranging from thousands to hundreds of thousands of monthly users
- Worked across multiple high-traffic projects where scalability and long-term architecture planning were critical
- Focused on building systems with future growth and edge cases in mind
- Regularly optimised projects for SEO, performance, and Google Core Web Vitals
- Experienced balancing performance, maintainability, and infrastructure costs
- Strong awareness of revenue impact and infrastructure efficiency when working with usage-based services such as AWS

Refactors & Migrations

- Worked on multiple large-scale refactors and migrations across long-running projects
- Key contributor to the Bookies.com migration from Twig/PHP architecture to Laravel in early 2020
- Experience modernising legacy systems and improving maintainability

AI & Automation Experience

- Lead Developer for BetSyndicate.ai, a platform using AI-driven betting models and data analysis to identify high-value and unique betting opportunities
- Regularly use AI-assisted development tools including Claude (Cursor), GitHub Copilot, and Replit
- Experience incorporating AI tooling into development workflows and code review processes
- Experience working with AI-assisted recommendation systems and sports analytics data pipelines

DevOps & Tooling

- Docker
- GitHub Actions
- CI/CD workflows
- Git version control
- Tailwind CSS
- REST APIs
- Redis
- MySQL / PostgreSQL
- Jira
- Confluence
- Figma
- Cloudflare

Additional Information

- 7+ years professional development experience
- Experience working across web, adtech, affiliate, AI-driven, and mobile platforms
- Strong understanding of responsive design and modern frontend practices
- Experience contributing across both frontend and backend systems

Portfolio & Featured Projects

RW Football (React Native)

Fantasy NFL companion application available on the App Store.

Features

- AI-driven player recommendations
- Push notifications for players and teams
- Sports news integration
- Data-driven draft recommendations using player and team statistics
- Integration with OpticOdds and Rotowire data services

Final Year Software Project – IoT Security System

Award-winning IoT-based home security system designed to support elderly users.

Features & Recognition

- Built using Raspberry Pi, Grove Pi, sensors, live streaming, and Alexa voice integrations
- Included smartphone application, motion detection, notifications, and emergency alerting
- Achieved a 1st grade final result
- Runner-up for a Robert Walters award during NCI project showcases
- Featured by Irish Tech News during the NCI showcase event
